

<b>Poster</b>	<b>Poster Title (Pyroasia 2024)</b>
<b>Poster 1</b>	<b>Deepraj Sarkar, MNIT MAHE, Karnataka</b> Fabrication of biofilms using plant-based extract for the food packaging application: A review
<b>Poster 2</b>	<b>Tanushka Florence Panicker, MNIT MAHE, Karnataka</b> Pyrolysis behaviours and kinetic study of non-edible waste castor seeds into renewable liquid fuel and value-added chemicals
<b>Poster 3</b>	<b>Sowkhya Naidu, Manipal University Jaipur</b> Temperature-Dependent Pyrolysis of Biomass Feedstocks: Chemical Characterization of Bio-Volatiles from Cashew Nuts and Pine Needles
<b>Poster 4</b>	<b>Anurag Jaswal, IIT Ropar</b> Optimizing Pine Needle Pyrolysis: Role of Chemical and Thermal Pretreatment
<b>Poster 5</b>	<b>Bhawana Bharti, MNNIT Allahabad, Prayagraj</b> Kinetic and thermodynamic analysis of pyrolysis of microalgal biomass: using model free approaches
<b>Poster 6</b>	<b>Shahista Farhee, IIT Kanpur</b> Characterization and nutrient availability of biochar produced from slow pyrolysis of commercially cultivated spirulina
<b>Poster 7</b>	<b>Rakhi Giri, Manipal University Jaipur</b> Impact of Agricultural Waste-Derived Biochar on Rice Seed ( <i>Oryza sativa</i> ) Germination and Growth: A Study of Varying Concentrations
<b>Poster 8</b>	<b>Kumari Anshu, IIT Roorkee</b> Identification of Fast Pyrolysis Primary Products of Rice Straw by Using A Pyroprobe Integrated With an Ion Trap Tandem Mass Spectrometer
<b>Poster 9</b>	<b>Amit Tiwari, NIT Rourkela</b> Comparison of conventional and microwave-assisted pyrolysis for biochar production from tea waste
<b>Poster 10</b>	<b>Debaditya Gupta, IIT Guwahati</b> Optimization of pyrolysis process parameters of biochar produced from Gulmohar pods through response surface methodology
<b>Poster 11</b>	<b>Rohit, IIT Bombay</b> Kinetics and thermodynamic analysis of pyrolysis of combustible fraction of municipal solid waste using model-free approaches
<b>Poster 12</b>	<b>Aakash Rajpoot, IIT-ISM Dhanbad</b> Co-pyrolysis of waste low-density polyethylene and waste nitrile gloves to produce liquid fuel
<b>Poster 13</b>	<b>Mahendra Tiwari, IIT Madras</b> Valorization of Waste Streams: Biochar Production from Paper Sludge, Camel Dung, and Food Sludge via Microwave Pyrolysis
<b>Poster 14</b>	<b>D.Catherine, CSIR NEERI &amp; IIT Madras</b> Valorization of individual citrus peels through anaerobic digestion and pyrolysis
<b>Poster 15</b>	<b>Shivshankar Prasad, IIT-ISM Dhanbad</b> Sustainable production of biopolymer precursor from waste biomass derived sources for circular economy
<b>Poster 16</b>	<b>Srinivasan Santhosh, IIT Madras</b> A Comparative Assessment of Hydrothermal Liquefaction and Pyrolysis Process for Woody Biomass Valorization to Liquid and Solid Fuels
<b>Poster 17</b>	<b>Suryakanta De, Shiv Nadar Institute of Eminence, Noida</b> Co-gasification of rice husk and cashew nut shell at high temperature and pressure in a dynamic environment of steam, air, and nitrogen in a downdraft fixed bed reactor
<b>Poster 18</b>	<b>Ashmita Das, IIT Guwahati</b> Fabrication of peroxidase mimic Fe <sub>3</sub> O <sub>4</sub> /biochar nanocomposite from spent mushroom substrate

<b>Poster 19</b>	<b>Kale Ritisha Digvijay, NIT Karnataka</b> Effect of Different Susceptors on Product Distribution in Microwave-Assisted Pyrolysis of Coconut Shell Biomass
<b>Poster 20</b>	<b>Malavika P.V., NIT Karnataka</b> Bayesian Optimization of Microwave-assisted Co-pyrolysis of Biomass and Plastic
<b>Poster 21</b>	<b>Hemant Kumar Bajaj, NIT Karnataka</b> Numerical simulation of microwave assisted catalytic pyrolysis of biomass for fuel production
<b>Poster 22</b>	<b>Rajpal Choudhary, Manipal University Jaipur</b> Exploring Sludge Biochar as a Soil Amendment: Characterization and Its Impact on Indian Mustard Growth and Rhizospheric Microbial Community
<b>Poster 23</b>	<b>Shariq Farhan Elahi, IIT-ISM Dhanbad</b> Green Production of Aviation Fuel Blend, Butyl butyrate using Silicotungstic Acid Catalyst
<b>Poster 24</b>	<b>M.S.Giridara Srinivaas, IIT Madras</b> Recycling waste wind turbine blades using pyrolysis
<b>Poster 25</b>	<b>Pankaj Parmar, IIT Kharagpur</b> Waste to alternate energy resources from biomass pyrolysis
<b>Poster 26</b>	<b>Suchetna Kushwah, IIT Guwahati</b> Comparative Study of Conventional Pyrolysis and Hydrothermal Carbonization of Macroalgae Biomass to produce Biochar/Hydrochar
<b>Poster 27</b>	<b>Abhishek Kumar, IIT Guwahati</b> Microwave Pyrolysis for the Synthesis of Hierarchical Porous Carbon Using Green Chemicals for Enhanced Energy Storage
<b>Poster 28</b>	<b>Ashish Ranjan, IIT Guwahati</b> Effects of temperature and duration of pyrolysis on properties of biochar derived from Erythrina indica biomass
<b>Poster 29</b>	<b>Sachin Kuriachan E, IIT Guwahati</b> Thermal Recycling of GFRP: Fiber Recovery via Pyrolysis and Combustion
<b>Poster 30</b>	<b>Young-Min Kim, Daegu University, South Korea</b> Innovative Valorization of Cigarette Butts: Pyrolysis-Derived Acetic Acid for Cost-Effective Salt-Free Deicer
<b>Poster 31</b>	<b>Hoesuk Yim, Daegu University, South Korea</b> Low-aromatic oil production through catalytic pyrolysis of waste plastic- derived wax
<b>Poster 32</b>	<b>Pragadeshwar Babu M V, IIT Madras</b> Sustainable Valorization of Polyurethane packaging foams through Hydrothermal Liquefaction for platform chemicals recovery
<b>Poster 33</b>	<b>Nishanthi Rajendiran, CSIR-Central Leather Research Institute, Chennai</b> Production and characterization of biochar from Tender coconut waste
<b>Poster 34</b>	<b>Anusha Kadimisetti, IIT Madras</b> Development of A New Mill for Solids; Polymer and Inorganic materials
<b>Poster 35</b>	<b>Soumyajit Chandra, Sharda University, Noida</b> Biochar-Enhanced Dark Fermentation for Sustainable Biohydrogen Production
