Abstract:

The content of the extended abstract will be the basis for accepting the paper for presentation/ inclusion in the conference proceedings, and needs to be submitted in a doc. file. The abstract should be a single paragraph, text justified, with no subheadings, indentation, and references. It should be an explicit summary of the problem, objectives, methods used, major results, and conclusions. The lines should be single-spaced in 12-font size (in Times New Roman). Avoid using bullets/lists/references in the abstract. For citing references, please provide inside the bracket in chronology. Don't cite any news articles or books. All units should be represented in the SI unit. Don't provide any mathematical formulae/abbreviations/incorrect chemical formulas in the abstract. The initial part of the abstract should discuss the problem or issue, and the scientific rationale behind pursuing the research work. In line with this a small description of the research methodology, which later will be followed by the results and discussions. Towards the end, the abstract should conclude with a statement indicating the practical implication/contribution of the proposed work. **Be sure to adhere to the word limit for the extended abstract (250 words).** Keywords should be provided after leaving a one-line space below the abstract and should be separated by a semi-colon, with each word starting with capitals.

Keywords: *River; Streams; Lake; Catchment; Erosion; Vegetation* **(max. 6 keywords)**

Themes: **List the relevant theme/thrust area here. Visit the website conference website.**
